This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION.

This report is the seventh of its kind to be issued by the Controller, under a provision of the codes requiring the annual publication of the Financial Transactions of Municipalities and Counties of California.

The present report, covering the fiscal period of twelve months of 1916 and 1917, deals with fifty-eight counties and two hundred and forty-nine incorporated towns and cities.

California cities range in estimated population from 600,000 down to 100. The difficulty of collecting comparable data from cities of such wide range in population and functions is easily understood by even the inexperienced; and, so that the financial activities of each may be properly shown, we have adopted a modified form of the United States Census Bureau plan to the end that the classifications used may be uniform and comparable not only with similar cities of California but with like cities of other states, most of which are using the federal forms and classifications.

We have trouble in getting the receipts and payments properly classified under the present system of having county auditors and city clerks and auditors render the report. The only remedy for this is for the department to have its own field deputies, or at least one or two supervising field deputies to check up the work of those that show incorrectness. The field deputies would confer with city and county officials in order to bring about a better understanding of the classifications used and assist in all matters pertaining to the betterment of conditions.

An incorrect report is not always the fault of the officer responsible for the data presented. It is very often that his idea of the classification of a receipt or disbursement does not agree with the one approved and frequently he has an extremely good reason for his classification based upon local conditions of which the compiling officer is ignorant. In all cases where an error in classification is apparent, the correction is made before the report is compiled for the printer.

In cities incorporated under the general laws of California, the city clerk is elected every two years, while the county auditor is elected every four years; so that about the time the clerk or auditor becomes an efficient officer an election is held and he is often replaced by a new man. This is a further argument in favor of field deputies from this department.

Digitized by Google

Public Expenditures.

Still with the same thought in mind that actuated me in 1915 and 1916, I again emphasize the fast-growing cost of government in California. The previous issues are sufficient to show how seriously I regarded the situation before this titanic war came along with its awful burden of cost. A situation that was pregnant with danger before has now become acute. I will not at this time attempt to give federal figures as to the cost of the war and the corresponding burden upon the people. It is sufficient to say that for the year 1918, the government at Washington plans to expend within $5,000,000,000 of what it spent from 1791 until this war began. The total as estimated for 1918 is about $21,000,000,000, to be raised by direct taxation and the sale of bonds. In the end the people must foot the bill.

Since the publication of my last annual report, I have given much thought to encroachments by the federal government upon so-called sources of state revenue. Impressed by the rapidly mounting cost of government in the states and their political subdivisions, I turned my thoughts toward the federal field to see what the future might hold for us there. All this was before we entered the world war. I found the situation to be anything but encouraging; I found it to be fraught with grave danger. Indeed, I found the situation so involved that I feel it will require the highest statesmanship in the nation to ever work out the solution. And it is obvious, of course, that the war burdens have tremendously accentuated the complexities of the problem.

Seeking more revenue, the federal government, perhaps naturally, turned to certain sources from which the states, or at least many of them, were receiving heavy returns. Having the legal right to do so, the officials at Washington seemed to lose sight of the equity of the situation. They seemed content to surmount their own fiscal difficulties at the expense of the states, being willing to transfer their troubles to the subdivisions. The first inroad by the federal government was the taxation of corporations in 1909; the second the taxation of incomes in 1913, and the third the taxation of inheritances, in 1916.

Following the initiation of the taxation of these sources, congress has from time to time advanced the rates; and therein lies the danger to the states. If congress shall continue to pursue this policy, and the war burdens will more than ever make for such a policy, then the time will come when the states either will have to reduce their rates as to these sources and perhaps others, which they can not afford to do, or else will be compelled to abandon these sources entirely, which, of course, they can afford to do still less. The idea in my mind is this: that there is a limit to the burden any particular source of revenue can bear.

Digitized by Google

Let me illustrate. For the fiscal year ending June 30, 1917, I collected from inheritance tax sources, in round numbers, $4,000,000. I am now convinced from the increased federal rates that, upon a similar volume of business, the government at Washington would take from California at least as much as we are collecting, if not more. In other words, in a state with a population not exceeding 3,000,000, this particular source of revenue is carrying a burden of $8,000,000. How long can this dual tax be continued, with ever-increasing rates? The danger to my mind is very pressing indeed, and calls for the best thought in the nation. In such a report as this, I can merely seek to indicate, not to discuss questions in detail.

As indicated in former reports, I have taken the period beginning with the year 1911 as a basis for my comparisons for the reason that it was in that year the state began its new system of taxation whereby it took over the corporations and abandoned general property to the counties, and also because it was not until that year that the Controller's office under the law was authorized to collect financial statistics from the counties and the cities. Before 1911, it was not possible to give an intelligent comparison as between county and county, city and city or year by year. The state government of California has been in existence sixty-eight years, and during that whole period there has never been anything like a real investigation, a real survey, to see where real economies could be effected and yet efficiency maintained, if not enchanced. So, I do not wish to be understood as meaning by the figures in the period I use to confine my criticism and my comment to that particular time. I merely use them as illustrative.

I find that for the seven fiscal years ending June 30, 1917, that state receipts from all sources increased 89 per cent, county receipts 100.2 per cent and city receipts 45 per cent, giving a grand total of 234.2 per cent for the three, or an average increase in receipts of 78 per cent.

I find that along the line of expenditures, for all purposes, those of the state increased in the seven years in question 93.6 per cent, those of the counties 118 per cent and those of the cities 67.5 per cent, or a grand total of 279.1 per cent, the average being 93 per cent.

Now, as against these increases in receipts and expenditures (and it will be noted, incidentally, that expenditures in these seven years increased by 15 per cent more than did receipts) our population increased, it is estimated, 30 per cent, and our total wealth, as based upon the assessment rolls of the counties, 41 per cent. In other words, this is a striking illustration of the statement so often made that the cost of government in the United States is increasing faster than population or wealth, and possibly faster than income. The table as bearing out these figures is herewith submitted:

Receipts and Payments.

	State receipts.	State payments.
1911	$17,882,091.37	$18,020,555.39
1912	21,445,956.99	18,691,877.28
1913	25,052,863.10	22,900,416.40
1914	35,895,013.58	28,655,022.55
1915	29,830,182.34	36,529,593.04
1916	37,902,612.96	36,035,889.77
1917	33,819,867.73	34,886,139.73

	County receipts. (Less city and county of San Francisco.)	County payments.
1911	$41,345,925.99	$36,272,598.02
1912	52,972,943.34	49,766,336.20
1913	55,702,561.83	56,212,591.51
1914	57,927,987.85	55,263,728.23
1915	68,457,388.51	69,970,496.88
1916	75,092,681.45	74,649,396.73
1917	82,798,626.57	79,055,350.99

	Municipal receipts. (Including city and county of San Francisco.)	Municipal payments.
1911	$46,777,803.61	$43,808,965.13
1912	60,557,300.34	53,251,005.27
1913	63,838,310.05	67,089,259.36
1914	66,830,330.37	58,175,734.68
1915	68,724,578.54	69,922,592.41
1916	68,305,640.66	65,183,196.44
1917	67,995,278.71	73,393,193.13

Let us now consider the particular expenditures for the fiscal year ending June 30, 1917. The grand total of the three forms of government is $187,334,683.85, as compared with a grand total for the year previous of $175,868,482.94. In 1917, the total expenditures of the state government were $34,886,139.73, as compared with $36,035,889.77 in 1916; the 1917 expenditures of the counties totaled $79,005,350.99, as compared with $74,649,396.73 in 1916, and the grand total for the cities for 1917 is $73,393,193.13, as compared with $65,183,196.44 in 1916.

In other words, the payments by the cities in 1917 were $8,199,987 more than in 1916, while the receipts were approximately $300,000 less. Consequently, the excess payments must have come from unused bond funds of previous years. In the counties, the advance in payments of 1917 over 1916 was, in round numbers, $4,400,000, while the state payments were $1,150,000 less. This makes a net total of $11,466,200.91 more money expended in 1917 than in 1916.

I herewith submit a table showing in detail the classified expenditures by the governments of the state, the counties and the cities:

Digitized by Google

Table Showing Total and Comparative Costs of Governments of California for 1917.

Function	State	County	Municipal	Total
General government	$2,590,916 80	$7,536,128 29	$4,776,644 92	$14,903,690 01
Protection to person and property	2,592,945 42	2,863,265 53	9,781,816 61	15,241,027 56
Conservation of health	209,688 21	160,504 23	600,490 15	970,682 59
Sanitation and promotion of cleanliness	20,257 67	20,019 90	3,594,926 39	3,635,203 96
Highway, bridges, etc.	3,466,438 16	15,059,232 32	10,438,674 57	28,964,345 05
Charities and corrections	5,520,611 34	4,799,697 63	1,921,724 28	12,242,033 25
Education	11,091,585 21	30,130,088 81	4,828,715 99	45,950,390 01
Recreation	10,413 57	116,523 52	2,730,413 67	2,857,350 76
Miscellaneous	297,129 43	2,096,583 52	598,160 54	2,991,873 49
Interest on bonds and debts	1,858,760 00	3,014,646 51	6,442,045 51	11,315,452 02
Redemption of debt	145,000 00	2,061,034 90	8,634,431 71	10,840,466 61
Trust funds	2,166,800 56	2,728,427 59	2,927,808 10	7,823,036 25
Agency transactions	2,208,061 90	8,466,198 24	----------	10,674,260 14
Public service enterprises	2,707,531 46	----------	16,117,340 69	18,824,872 15
Totals	$34,886,139 73	$79,055,350 99	$73,393,193 13	$187,334,683 85

Tax Analysis.

For the first time, the statistical department of the Controller's office has collected data as to the special taxes levied. During many years we have published the amount of taxes levied under the general county rate, but not the special county and district taxes. The recapitulations which follow show that the general county tax levy for 1917 amounted to $49,766,050.34, and the special and district levies to $15,363,930.13, or a total tax levy for county governmental purposes of $65,129,980.47.

This data should furnish for the tax expert and the governmental economist a very interesting study. Of the total, the amount set aside for educational purposes was equivalent to 39.65 per cent; for general purposes, which includes many branches of governmental functions, 28.70 per cent; roads and bridges, including the interest and redemption of road and bridge bonds, 12.22 per cent; or, in other words, of the grand total, these three branches call for 80.57 per cent. This is the average, of course. Many of the counties surpass either the general average or the particular averages as shown by the preceding percentages. For example, in Los Angeles County, out of a total levy of over $14,300,000, the educational division is given over $8,800,000, or, to be exact, 61.6 per cent of the entire amount.

It should be stated that the grand total under the classification of education in the preceding table of $45,950,390.01 includes a duplication of $6,643,855, representing the state's contribution to the support of the schools. In other words, this particular amount is charged against the state, and also against the counties. The state merely acts as an agent for the counties in collecting this money, and it should not, as a matter of justice, be charged against state expenditures at all.

Digitized by Google

It also should be stated here that to get the actual net payments of the cost of government, the subventions and grants should be deducted as follows:

Counties	$7,529,856.21
Cities	2,172,489.56
Total	$9,702,345.77

Thus leaving net as the cost of government in 1917 $177,632,338.08. In a previous paragraph where I compare 1917 with 1916, the gross totals are used.

In tables 34 and 35 of the report will be found the amounts classified under the proper headings and showing the levies of each county, of which the following tables are recapitulations:

Recapitulation of General Taxes Levied for the Year 1917-18.

The Tax Limitation Law.

The legislature of 1917 created a State Board of Authorization, consisting of the chairman of the Board of Equalization, the chairman and one other member of the Board of Control, the State Controller and one other state official to be appointed by the Governor. The duty of this board was to supervise expenditures by the counties, and they were to be controlled through a practical, comprehensive budget system.

Briefly, the law provides as follows: The expenditures of a county in any one year shall not exceed by more than 5 per cent the expenditures of the preceding year, due provision being made for emergencies. The Board of Authorization must approve all budgets or reports filed with it by boards of supervisors even if the 5 per cent is not exceeded; where exceeded, a statement giving in detail the purposes of the proposed excess must be submitted and approved by the Board of Authorization before the supervisors can make their tax levy. Each county official must file with his board, which can revise and change it, a budget covering his office; and the supervisors, upon forms furnished by the state, then prepare the full budget of the county. County officials must file with their board by June 1, and the supervisors to the state board by July 1. No time is fixed in which the Board of Authorization must act. Should it disapprove a budget, a referendum petition, to be effective, must be filed within ten days and contain the names of 15 per cent of the electors

Digitized by Google

of the county concerned. It is admitted that the measure may need amendment as to some of its detail, particularly as to the filing dates and as setting a time in which the Board of Authorization must act.

The statute, as passed, applied to counties only. Except as to cities of the sixth class, it could not apply to municipalities, or to the state government, without a constitutional amendment. It was further provided in the law, however, that any city voluntarily could come under it if it saw fit.

The measure had smooth sailing through the legislature until toward the close of the session. At that time opposition developed through certain boards of supervisors and people interested in the conduct of the schools of the state. The committee representing the supervisors opposed the law principally on the ground that they considered it unnecessary and an interference with and an infringement on the rights of the counties. The school people opposed the law on the ground that they feared the 5 per cent limitation would not prove sufficient, and, therefore, that in cutting expenditures the boards of supervisors might make the schools suffer. The bill, however, was passed by the legislature, signed by the Governor and, in due time, became a law. The school people were not content, and so decided to invoke the referendum, which they did successfully, and the law is now so held up, for submission to the people in November, 1918.

But before the referendum became effective, the State Board of Authorization passed upon a great many of the reports or budgets sent in by various boards of supervisors. The Board of Authorization had anticipated considerable friction with the counties, but none whatsoever developed. The various boards of supervisors responded in a most satisfactory manner, generally speaking. San Francisco, being a city and a county, did not come under the law, leaving fifty-seven counties to be considered. Of this number, thirty-two budgets were actually examined by the Board of Authorization and approved; thirteen budgets had been passed upon and were ready for action; seven were on hand but not examined, and five counties failed to report up to the hour the referendum became effective. Of the thirty-two budgets approved, nineteen were under the 5 per cent limitation, and thirteen were over, but in every case the excess was due to contracts or obligations incurred prior to the passage of the law. The grand total asked in these thirty-two budgets was $17,054,607.91, and the total allowable under the 5 per cent was $16,672,454.01. In other words, the excess was only $382,153.90. This I consider a remarkable showing, in view of the fact that the law came almost out of a clear sky, taking the various boards of supervisors practically unaware.

It is earnestly to be hoped that the law will be sustained by the people in November. The limitation of expenditures is one of the most effective remedies to bring about a reduction in the cost of government, to check our ever-increasing public expenditures. Even as the matter stands, however, much good has been accomplished. A better understanding of the law prevails, and consequently less antagonism. Light has been thrown upon the manner in which governmental business should be transacted. The need of uniform accounting and practical, comprehensive budget systems is realized now as never before in the history of California officialdom. Counties that never had arranged their financial affairs upon a real budget basis, and the large majority never had, did so under the law, and, if appearances count, liked the experience. It seems certain that many of them will continue the procedure regardless of the fate of the particular law in question.

If nothing more comes from this law than a clearer understanding of government finance upon the part of officials, even if the people fail to respond; if nothing more comes than the gradual adoption throughout the state by the counties—and some day, let us hope, by the cities, too—of uniform accounting and budget systems, a long step forward will have been taken; a long step in the curtailment of public expenditures, even though there be no limitation law.

But, in my judgment, should this law not be upheld by the people next year, the more orderly way of transacting governmental business that has followed the temporary enforcement of the measure and which, in my opinion, will continue to improve, will create so favorable a sentiment that little or no opposition will develop to the enactment of a similar statute in due course. But the better way, and the way which I think will prevail, is the defeat of the referendum in November and the approval of the law by the people.

Assessment and Taxes.

The value of property on the 1917 county assessment rolls, including the operative property, which is not subject to local taxation, amounts to $2,924,836,032, to which is added the valuations of the city and county of San Francisco amounting to $755,888,774, making a total assessed value of the counties $3,680,724,806. The value of the city assessments amount to $2,404,710,305. This amount, however, is a duplication of a portion of the county assessment and we are, therefore, basing our figures on the county rolls.

The State Tax Commission in its report of 1916–17 found the ratio of assessed to true value to be 42.75 per cent for the state. Using this

Digitized by Google

as the basis for figuring the true value of California property, would bring a grand total of $8,609,900,600 in the state, not including property exempt from taxation amounting to many millions of dollars.

This exempt property is made up of educational and religious institutions, property of United States sailors and soldiers to the amount of $1,000 each, growing crops, vines and trees, $100 worth of personal property of each taxpayer, vessels of over fifty tons burden registered in this state, bonds or property of the United States and the state of California, including her political subdivisions, except such property as lies outside the boundaries of such political subdivisions.

Under this heading and very closely allied with it, comes the double assessment of property. The county assessor places a valuation for county and state purposes upon all property in the county subject to taxation, which, of course, includes such property as lies inside the limits of an incorporated town or city. The city assessor duplicates this work for the purposes of levying the city tax.

Another perplexity confronting the taxpayer is not only the amount of taxes he pays, but also the many and various dates when such taxes become due. Many taxes go delinquent simply because the time for paying them has elapsed without the knowledge of the owner. We have our county tax, city tax, income tax, franchise tax, motor vehicle tax and corporation license tax, all of which become due at different times. As a protection to the taxpayer, all local and state taxes at least should be due and payable at one time. This, of course, would mean a heavier payment at one time, and might prove inconvenient, but delinquencies could be avoided.

Bonded Indebtedness.

The following table gives a clear conception of the bond history of the cities of California:

Total issued, including 1917	$217,893,195.72
Canceled or unsold	53,223,837.50
Actually sold	$164,669,358.22
Outstanding at present report	139,451,711.68
Total amount redeemed to date	$25,217,646.54
Amount of bonds outstanding in cities	$139,451,711.68
Amount of bonds outstanding in counties	64,003,251.83
Amount of bonds outstanding in state	34,493,500.00
	$237,948,463.51

Digitized by Google

There are $28,875,000 worth of state bonds that have been voted in addition to the $34,493,500 above, but have not yet been sold.

Both the 1915 and 1916 reports advised the issuing, in cases of necessity, of a short-term, serial bond instead of the long-term bond so generally issued in the past.

This year the cities voted down bond issues in the amount of $4,858,500, as against $12,679,500 in 1916. The bond increase in the cities was $11,539,520.06 for the year, against $16,466,728.12 for 1916, and $14,859,787.57 for 1915. This would lead to the supposition that a less number of bond propositions were placed before the voters than in the previous years, and indicate that education along these lines is having an appreciable effect upon the intelligent voter. The stand I have taken is that we can not eliminate bond issues, but that they should be held to matters of the first importance which would impose too heavy a present burden if undertaken by direct taxation. This is the exact statement I made in the report of a year ago.

The total amount of interest paid by the several governments total $11,315,452.02 and is divided as follows:

State	$1,858,670.00
County	3,014,646.51
Municipalities	6,442,045.51

Prior to 1895, the cities of California were practically free from debt. There were a few scattering issues even before 1880. It was about 1895 that the population began to increase rapidly and with it came the increased governmental functions incidental to a fast-growing government. At the same time, the municipal ownership idea began to appeal, with the result that in the following ten years bonds were voted for any and all improvements. In 1904 San Francisco voted something over $17,000,000 of 3½ per cent bonds, of which over half were canceled because municipal securities bearing that small rate of interest could not be disposed of. From then the rates began to rise, and now are probably on an average of about 5 per cent.

Municipal Service Enterprises.

In a great many instances our municipal service enterprises do not provide for their bond interest and redemption from the revenue of the plant, but from a direct tax levy upon property. However, in the majority of cases such plants show a good earning power and all expenses should be met from the revenues derived from operation,

Digitized by Google

with the possible exception of a large extension to serve an outlying population or lately annexed territory.

In most instances, in municipally owned water and light plants, the rates are less or the service better than those of a private corporation, but a private corporation not only expects all expenses, including bond interest and redemptions and depreciation, to be met from the proceeds of operation of the plant, but also a substantial dividend.

A municipal plant should not be expected to accumulate a large surplus any more than a city should collect excessive taxes for the purpose of establishing an unduly large reserve fund, nor should the plant be expected to raise revenue to be transferred, at the pleasure of the governing body, from that fund to some other for the benefit of some function foreign to it.

The rates should be made so that those receiving the benefit of superior service or lower rates should pay the annual cost of the source of such benefit.

The Accounting Problem.

In going over the state, we find many different systems of accounting. In some few the system, so called out of courtesy, is a relic of the incorporation of the city or county; in others, there is too much system, causing an unnecessary duplication of work, which is expensive and does not provide more or better data than a modified, efficient form, based on sound accounting principles and showing at all times any needed data.

Such a system of accounting is being worked out and installed by the accounting department of the State Board of Control for the counties. The department has not as yet, owing to its limited force, written a procedure for the cities, but has devoted its time to such counties as have made requests for the system.

The new form places the books of account upon a revenue and expenditure basis in place of the older "Cash Book" method of receipt and disbursement, and makes the monthly trial balance and the closing of the books at the end of the fiscal period easy of accomplishment.

Some of our cities operating under freeholders' charters have a provision whereby the clerk or auditor is appointed by the board. This condition also applies to at least one of our counties. This, in our opinion, is an unwise procedure. The clerk or auditor is the financial

Digitized by Google

check upon city or county payments; therefore, making such officer an appointee of the board, more especially one with the power of removal, takes away, to a certain extent at least, his independence, and the check, therefore, is not of the pronounced value that it is in an elected official, responsible to the people at large.
